

IOTA ROBOT CLUB APES

Whitepaper

Legal Disclaimer

The primary purpose of this whitepaper is to provide potential token holders with pertinent information for them to thoroughly analyze the project and make an informed decision. Prior to your participation in this platform, we strongly advocate a careful study of this whitepaper

Introduction

The worldwide market is being dominated by blockchain technology and cryptocurrencies, and the arrival of Web 3.0 indicates a potential for continued expansion.

We build a platform of growth IOTA Robot Club Apes that is offering an innovation unlike any other by fusing outstanding games, crypto currencies, NFT's, Metaverse and Blockchain. In this whitepaper we will discuss our APE Token that is active on IOTA and NFTs collection on IOTA and XRP.

APE Token and NFTs Collection

ABOUT APE TOKEN

Our token is deployed on IOTA as IOTA enables data exchange using the tangle Hub with Ethereum and Ripple. Tangle Hub unveiled a Shell API for PIPE, an open-source Layer-2 transfer and decentralized storage system. Through PIPE, data use cases will be much more scalable, affordable, and quick.

- The IOTA blockchain has significant restrictions that make it impossible to scale for high bandwidth and other high-frequency data storage use cases, despite the fact that it can store data.
- All of these constraints are removed by PIPE thanks to its key characteristics, such as scalability, immutable data storage and transmission, user-oriented design and performance, etc.
- Furthermore, PIPE guarantees that anyone can use its data storage solution. This was the reason that we have chosen IOTA for our APE Token.

We want to scale on more blockchains to interact, so that we're not limited to just XRP and IOTA.

- **Objective:** scale on more blockchains for greater interaction
- **Current limitation:** only on XRP and IOTA
- **Goal:** to have the largest possible interactions between the community through our metaverse
- **Initiative:** launching NFT collection and APE tokens

NFTs Collection

IOTA Robot Club Apes is the first multichain NFT collection that grants you access to our metaverse and more in the near future. Our NFTs collection is built on XRP ledger and IOTA Network. We choose IOTA and XRP Ledger due to following reasons.

DECENTRALIZED STRUCTURE

We believe that decentralization is the key to empowering people all around the world to better protect their rights, and that we can help the world get there by increasing the adoption of APE Token. The most essential attribute of decentralization is that it decreases business risk and enhances transparency.

HIGH PERFORMANCE

Our platform provides number one service because transactions are fast and never obstructed for more than a second, even when traffic is strong. It will generate a large index profit.

DECENTRALIZED EXCHANGE

Decentralized Exchanges enable users to trade APE Tokens for other assets without the need for a centralized intermediary or custodian. Traditional exchanges (centralized exchanges) provide similar services, but the investments available are subject to the will and costs of the exchange.

Another disadvantage of Centralized Exchange is the additional cost of each transaction, which is addressed with decentralized exchange. Main Advantages of decentralized Exchanges are Users' finances and personal data are safe because the system is trustless. The security and privacy of the user are carefully protected through XRP Ledger.

Main Functions of our NFTs

Metaverse Access

The popularity of the Metaverse is unrivalled. IOTA Robot Club Apes will have its own community Metaverse, in which you will be able to visit directly from the exchange platform without having to pay any fees for transferring your Ape Tokens. People will interact through our metaverse with every community. Our platform gives access to our community-built metaverse via different exchange platforms where APE Tokens can be used to buy things. It is the great initiative to combine reality and augmented reality in virtual reality.

Play in the Metaverse

Metaverse and NFTs are in sync with one another. Our NFTs collection has access to metaverse that creates an open and fair economy that is supported by IOTA and XPR; in our Metaverse users can play, and participate through APE Token. You can monetize the experiences you make within our platform by playing a game, which can be a great investment for small developers. Through NFTs, Metaverse allows users to access their digital avatars (replicas of their personal details). To confirm ownership of each personal, each avatar is tokenized.

Play to earn games

People 'earn' the most valuable items by competing in the game, and they may subsequently sell them for real money on their own terms. Our IOTA Robot Club Apes NFTs give access to all blockchain games, allowing users to immerse themselves in a gigantic world, experience the thrill of strategic game play and of course earn Ape Token in return.

Tokenomics

Token Name:

Ape token

Symbol:

APE

Launchpad Price:

1 APE = 0.01 MIOTA

Total supply:

100,000,000 APE

Conclusion

In this Whitepaper, we looked at APE Token and its NFTs collection. It is an innovative platform for everyone which helps to increase their value while also generating a new environment for them.
